

LELOZWI DUMEKO

JUNIOR DEVELOPER

[Email](#)

[GitHub](#)

[LinkedIn](#)

I was drawn to software development because it incorporates design, technical knowledge and logical thinking to solve real-world problems using out-of-this-world technology. My passion for learning and technology makes me a fast-learner, detail oriented and deadline-oriented. Searching for a team and company which will provide more structured growth, guidance, and clearer career-progression.

SKILLS

JavaScript
HTML5
CSS3
ReactJS
AngularJS
Bootstrap
Flutter
Cordova
GitHub
VS Code
Notion
Figma
MS SQL
Postman

SOFT SKILLS

Rapid learner
Deadline-oriented
Driven
Adaptable
Listening
Communication
Dependable
Organization
Time-management

EDUCATION

JAN 2024 – JUN 2024 Software Development Certificate –
CodeSpace Academy

I gained my initial exposure from CodeSpace Academy's online learning platform. The course focused primarily on Frontend Development. I received invaluable guidance from coaches who had industry experience on how to bring value to any time I might join as a fresher-developer.

FEB 2021 – MAR 2024 Bachelor of Social Science (BSocSci) –
University of Cape Town

I majored in Politics and Governance, and Philosophy. My studies nurtured invaluable skills in logical thinking, the ability to synthesize complex information from diverse sources in a short timeframe, and managing multiple deadlines while prioritizing my physical, spiritual, and emotional health. These skills have allowed me to excel in my current position as a trainee software developer.

EXPERIENCE

AUG 2024 – DEC 2024 TRAINEE FRONT-END DEVELOPER -
Hireandservice.com (HAS+)

Streamlined dashboards, pages, and components for Angular 18 compatibility. Migrated from JavaScript Maps to Angular Google Maps for route-planning modules. Updated Flutter version of mobile driver app. Updated, debugged and deployed mobile driver app to Google Play internal testing. Created and deployed Angular-Cordova mobile app.
